

REBALANCE REJUVENATE RELAX

Detox your body,
the easy way
with Bodetox
foot spa technology

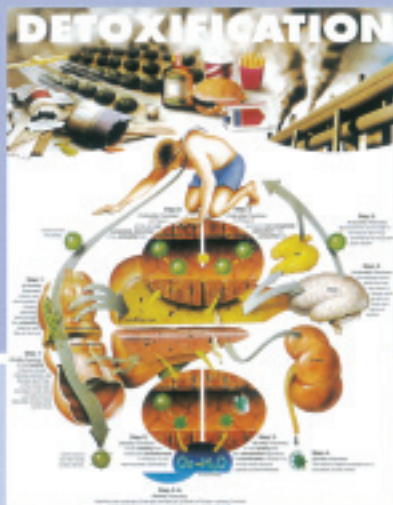

BODETOX

Brand new to Australia.

Why detox?

Toxins are everywhere

Your body takes in toxins as part of everyday life, by exposure to unnatural products such as tobacco, alcohol, food additives, drugs, medication, pesticides, heavy metals and industrial pollutants. Harmful waste is left in your body that attacks your immune system and causes a wide variety of side effects, such as lethargy, tiredness, headaches and migraines, colds and flu, sinus problems, bad skin, breath and body odour.

Your body tries hard to balance itself...

Your body detoxifies itself everyday, eliminating toxins and waste via your kidneys, liver, colon, lymph glands, lungs and skin. Your cells consist of electrical charges which, in an ideal state, emit a balanced proportion of positive and negative ions - which in turn removes toxins and effectively absorbs nutrients from food, water and oxygen.

.....but it needs help

However, trauma caused by lifestyle circumstances, such as poor diet, ill health, injury or lack of exercise, results in your cells becoming more positively charged and they stop working as effectively. Your natural detoxification process slows down and toxins are stored.

Luckily, you can now take a Bodetox foot spa and rebalance your body yourself.

A revolution in natural detox treatment

After just 30 minutes a Bodetox foot spa helps repair your immune system and detox your body from the effects of:

| | | |
|------------------|------------|----------------|
| Fat | Caffeine | Alcohol |
| Pollutants | Pesticides | Heavy metals |
| Drugs | Medication | Bad diet |
| Lack of exercise | Hormones | Animal protein |
